

Sinhué Siordia Millán

Data Scientist, Machine Learning Operations (MLOPs) Engineer & MS. Bioengineering & Intelligent Computing

PORTFOLIO

sinhuesiordia.com

Nationality: Mexican
Address 1: Culiacán, Sinaloa, México.
Address 2: Guadalajara, Jal, México.
Cellphone: (667) 130-26-28
Email: carpediem.sinhue@gmail.com

Valid US B1/B2 Visa
Languages: English B2
Linkedin: sinhue-siordia-millan
GitHub: SanehetSiordia

SUMMARY:

Data Scientist and MLOps Engineer with expertise in designing and implementing End-to-End Machine Learning lifecycles using Databricks, MLflow, Docker, and FastAPI. Solid leadership experience as Tech Lead, managing Agile teams and applying CI/CD best practices within cloud-native environments (GCP/Azure).

Passionate about using data to drive business value, from optimizing financial services workflows to developing deep learning solutions in the healthcare sector.

Certified in MLOps, Data Engineering, and Generative AI with a Master's degree in Bioengineering and Intelligent Computing and over 8 years of experience in research and development.

WORK EXPERIENCE:

Data Scientist and MLOps Researcher, Culiacán, SIN. (2026 - Present)

- Design and construction of a Job Workflow that extract, transform, and load (ETL) a dataset from a bank loan renewal call center, stored in Delta Lake storage, using the Azure Databricks platform.
- Project file:** [Renovacion Prestamo Databricks](#)
- Development, implementation, and integration of the bank loan renewal project with an End-to-End MLOps workflow using Docker, AWS S3 with DVC, MLflow, PyTests, FastAPI, and automatic CI/CD with model deployment on Google Cloud and registration in Vertex AI.
 - Project file:** [Renovacion Prestamo MLOPs](#)
- Implementation of machine learning models to classify and predict bank customers with a higher probability of renewing a loan, analyzing a call center dataset to identify patterns, trends, and correlations with the main objective of optimizing sales campaigns and reducing advertising costs.
 - Project file:** [Renovacion Prestamo ML](#)

Tech Lead, "Coppel S.A. de C.V", Culiacán, SIN. (2024- 2026)

- Design, manage, and lead development strategies to achieve project objectives.
- Lead Scrum ceremonies together with the Scrum Master to optimize and plan project objectives and development with the team members.
- Mentor development teams in applying development standards and clean code.
- Make code reviews of the development code and check the CI/CD pipelines in Azure DevOps for the integrations in the general and production environments.
- Monitor and support production deployments of software development on Red Hat Linux (On-Premise) servers and Google Cloud Platform (GCP).
- Write technical documentation for the software development process and product installation.
- Configure, maintain, and update development and testing environments.
- Implement IDC multi-factor authentication on Coppel web platforms.
- Design and configure API Proxies with Google Apigee.

Software Architect, "Coppel S.A. de C.V", Culiacán, SIN. (2023 - 2024)

- Design UML (Unified Modeling Language) diagrams for architecture solutions.
- Estimate timelines and costs for changes and development project proposals.

Quality Engineer, "Continental Automotive S.A. de C.V", Tlaquepaque, JAL. (2018 - 2020)

- Apply methodologies for root cause resolution in product quality failures.
- Implement Lean Six Sigma methodologies to optimize and improve quality processes.
- Define and implement continuous improvement strategies.

PROFESSIONAL SKILLS:

- Implementation of supervised and unsupervised machine learning models.
- Implement text analysis with Natural Language Processing (NLP) using deep learning models such as Bi-LSTM (Bidirectional Long Short-Term Memory).
- Design and develop End-To-End MLOps projects with automatic CI/CD and cloud deployments (AWS / GCP).
- Create ETL pipelines with Azure Databricks under medallion architecture using Delta Lake and Unity Catalog for data governance and security.
- Design and configure API proxies with the Google Apigee platform.
- Design, create, and maintain MySQL, PostgreSQL, and SQL Server databases.
- Design UML diagrams for project architecture solutions.
- Use of Scrum and Agile project management methodologies.
- Use and management of "Lean Six Sigma" tools.

SOFT SKILLS:

- Ability to adapt to any situation.
- Excellent disposition and work performance.
- Ability to design and plan work objectives.
- Ability to work responsibly and committed to multidisciplinary teams.
- Leadership skills, work under pressure, and personnel management.
- Ability to analyze and implement continuous improvement processes.

TECHNICAL SKILLS:

Programming Languages

- Python
- SQL
- Java
- C++
- C#

Software, Frameworks & Libraries

- Machine Learning: Scikit-learn, Keras
- Deep Learning: TensorFlow, Transformers, LLMs
- NLP: NLTK, Word2vec, GloVe, FastText
- Data Analysis: Pandas, Matplotlib, Seaborn

Big Data & Data Engineering

- Frameworks: PySpark, Spark SQL, Delta Lake (ACID, Time Travel, Vacuum)
- Databases: PostgreSQL, MySQL

MLOps, Cloud & Deployment

- MLOps & Workflows: MLflow, Apache Airflow, Lakeflow Jobs, Data Version Control (DVC), Evidently AI
- Model Deployment & DevOps: Docker, FastAPI, RESTful APIs
- Cloud & Infrastructure: GCP, AWS S3, Red Hat.

CERTIFICATIONS AND RECOGNITIONS:

- Data Engineering and AI with Databricks. (SDIDIA-20261535) (2026)
- MLOps Specialization: From Model to Production Environment. (SDMLO-20260131) (2026)
- Specialization in Data Science and Generative AI with Python. (SDIAG-20260816) (2026)
- Certificate in Lean Six Sigma Black Belt by Lean Six Sigma Institute. (BB-D01120) (2016)

ACADEMIC EDUCATION AND PROJECTS:

University of Guadalajara.

Master's degree in Bioengineering and Intelligent Computing. (2020 - 2022)

Automatic clinical classification and identification of laboratory variables related to pulmonary embolism and pneumonia from the analysis of electronic health records of Mexican hospitals using machine learning algorithms (**Decision Trees, Random Forest, Support Vector Machine, Neural Networks, Adaboost, and BiLSTM**) and **natural language processing (NLP)**. The information was extracted from PDF documents and stored in a MySQL Database using Python.

- **Project files:** [AI_EHR_MX](#)
- **Project Article:** [10.3390/diagnostics12102536](#)
- First Place of Student Contest Postgraduate Level from "44° National Congress of Biomedical Engineering" (2021) - **Project Article DOE:** [10.24254/CNIB.21.56](#)

Institute Technology of Culiacan.

Bachelor in Mechatronics Engineering (Professional License: 9803001). (2010 - 2015)
